Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 1654

6. Claims 11, 14, and 21-26 are rejected under 35 U.S.C. 102(e) as being anticipated by US Pat. No. 6,261,565 B1 (filing date September 28, 1998).

Applicant's claims are drawn to a composition comprising an amount of cinnamic acid useful for treating cancer or hypercholesterolemia. Applicant specifies that the cinnamic acid is isolated from cranberries.

US '565 teaches a composition that comprises cinnamic acid (see claim 20). The composition is used for treating cancer and high cholesterol (see claim 53); therefore, the cinnamic acid is administered in proper therapeutically effective amounts. The composition is formulated in many different forms including as an additive for food (see claim 26).

The reference does not specifically teach that the cinnamic acid is isolated from cranberry. However, cinnamic acid is considered to be the chemical compound no matter the source. Therefore, the limitation of isolation from cranberry is not considered to make the composition of cinnamic acid taught by this reference patentably distinct from the claimed composition because the compositions are the same chemically.

7. No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 1654

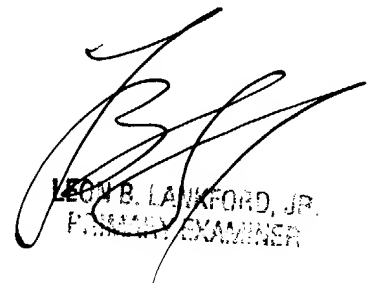

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
